PROFESSIONAL SUMMARY

Results-driven Software Developer specializing in the MERN stack (MongoDB, Express.js, React.js, Node.js). Brings 1.5 years of professional experience architecting scalable full-stack applications, optimizing RESTful APIs, and building responsive user interfaces. Proven track record of independently shipping production-style e-commerce platforms and modern business solutions, consistently aligning technical architecture with core business goals.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, Python, PHP, SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Web Design

Backend: Node.js, Express.js, PHP, Laravel, REST APIs

Databases: MongoDB, MySQL, Firebase

Tools & Practices: Git, GitHub, Postman, VS Code, npm, JSON, Agile, SDLC

PROFESSIONAL EXPERIENCE

GROOT Technologies

1.5 Years Experience

MERN Stack Developer

Ahmedabad, Gujarat

- Developed and maintained highly scalable full-stack web applications utilizing MongoDB, Express.js, React.js, and Node.js.
- Architected and optimized secure RESTful APIs to ensure seamless data flow and integration between frontend components and database models.
- Engineered responsive, modern user interfaces in React.js, improving client-side performance and user engagement.
- Collaborated closely on system architecture decisions, complex data logic optimization, and third-party service integration.
- Consistently debugged legacy codebases, enhanced application load speeds, and upheld strong software quality assurance practices.

KEY PROJECTS

PAKIZA BURKHA — Live Fashion E-Commerce Website

[Live Link](#) | [GitHub](#)

HTML, CSS, JavaScript, Bootstrap, Node.js, Express.js, MongoDB

- Engineered a complete, responsive e-commerce platform dedicated to modest fashion products with complex category management.
- Designed robust backend models to manage product inventory and handle real-world business inquiries utilizing MongoDB and Node.js.
- Deployed to production, implementing modern UI/UX principles that directly improved customer browsing experience and engagement.

AHNA GOLD — Jewellery E-Commerce Platform

[GitHub](#)

React.js, Node.js, Express.js, MongoDB (Full MERN Stack)

- Built a high-performance jewellery e-commerce platform end-to-end, featuring a dynamic React.js storefront backed by secure REST APIs.
- Developed advanced product cataloging, secure authentication, and complex search functionalities to optimize product discoverability.
- Modeled deep customer and product schemas within MongoDB, optimizing load performance and query speeds across all devices.

THIEST CAFE — Android Business Management Application

[GitHub](#)

Java, Android Studio, Firebase

- Developed a native Android ordering and management application covering distinct menu categories, customized product screens, and workflows.
- Implemented end-to-end cart state management, reducing friction during checkout, and integrated order tracking mechanics.
- Leveraged Firebase Realtime Database and Authentication for live data synchronization, user management, and seamless app performance.

EDUCATION

Master of Computer Applications (MCA)

2026 – Present

GLS University, Ahmedabad

Bachelor of Computer Applications (BCA)

2021 – 2024

Shreyarth University, Ahmedabad
